

Environmental Policy

J&B Recycling is a waste management company that specialises in recycling commercial, industrial and household waste. Our aim is to provide a total waste management service to our customers, which may include collection, sorting recycling, and disposal of all waste generated.

J&B recognises the need to operate its business in a manner that reflects sound environmental management balancing the business aims of the Company with the need to manage and protect the environment. J&B will take into account relevant environmental factors over which it can have influence and control when business decisions are made. To this end J&B will, as a minimum strive to prevent pollution by:

- Establishing an environmental management system which conforms to ISO 14001;
 - Recycling, transporting, storing and handling of commercial, industrial and household waste and disposing of all non-recyclable waste in a safe and responsible manner.
 - Continually seek to improve the environmental performance of our activities, products and services and systems that they support
 - Operating in a manner controlling releases to the air, water and land;
 - Establishing a framework for the setting of environmental objectives and associated targets.
 - Communicating the policy to all employees and all others working on behalf of J&B and making our policy available to the public.
 - Training employees and ensuring that they are competent to undertake their duties in accordance with the Environmental Policy, procedures and in a manner that facilitates achievement of objectives and targets

J&B will comply with all relevant environmental legislation and Regulations and other environmental requirements applicable to our environmental aspects and act openly with government officials at all levels to ensure full compliance with such requirements.
