

Energy Policy

Vision

J&B Recycling is part of the Urbaser group of companies, we recognise that the business & processing activities have an impact on our energy performance. As such we acknowledge that continuous energy use can have an adverse effect on the environment. J&B will contribute towards mitigating climate change through its energy strategy, which is aligned with Urbaser's strategy.

To support the use and generation of clean energy from renewable sources whenever it is technically and economically viable to do so. Striving to become leaders in the environmental sector through continuous improvement and fostering efficient energy management.

Commitment

At J&B we are all committed to:

- Ensure that the contentious improvement and monitoring programme are followed
- Measure and review energy performance targets
- Increase energy efficiency across the company
- Undertake audits and monitor energy performance to identify trends

Policy

Every J&B site and function shall:

- Promote energy performance awareness and education to all employees.
- Reduce energy consumption and increase energy efficiency in buildings and all equipment.
- Reduce reliance on fossil fuels and prioritise energy from renewable sources
- Promote sound energy management procedures and practices across all areas of activity.
- Implement an effective Environmental Management System certified to ISO 14001.
- Set objectives and targets to reduce energy use and meet energy performance targets that are reviewed annually and reported.
