Introductory note

This introductory note does not form a part of the notice

The following notice gives notice of the variation of an environmental permit.

The variation is to add two non-hazardous and three hazardous waste codes to the list of permitted waste types. This does not require any operational changes or any changes to any conditions of the permit other than adding new conditions for the storage of hazardous waste and fire prevention. The total annual storage limit is remained unchanged for the site.

The schedules specify the changes made to the original permit.

The status log of a permit sets out the permitting history, including any changes to the permit reference number.

Schedule 3 – conditions to be added

The following conditions are added as a result of the application made by the operator

- Condition 2.4

2.4 Technical requirements

Hazardous waste storage

2.4.1 Hazardous waste shall not be mixed, either with a different category of hazardous waste or with other waste, substances or materials, unless it is authorised by schedule 1 table S1.1 and appropriate measures are taken.

- Condition 3.5

3.5 Fire prevention

The operator shall take all appropriate measures to prevent fires on site and minimise the risk of pollution from them including, but not limited to, those specified in any approved fire prevention plan.

3.5.1 The operator shall:

- (a) if notified by the Environment Agency that the activities are giving rise to a risk of fire, submit to the Environment Agency for approval within the period specified, a fire prevention plan which prevents fires and minimises the risk of pollution from fires;
- (b) implement the fire prevention plan, from the date of approval, unless otherwise agreed in writing by the Environment Agency.
